

Chemical Free Cleaning

Chemical products play a huge part in the cleaning industry but also bring burden, not just in ecological terms but of packaging waste and shipping. At Exclusive we have found an alternative that substantially reduced that burden.

Toucan Eco

Toucan Eco is a simple combination of salt, water and electricity which when activated together creates a cleaning solution with disinfection properties and it is 100% Environmentally Friendly.

It has enabled Exclusive Group to reduce their chemical basket by 80%, therefore reducing risk to both colleague and customer, whilst at the same time enabling us to deliver many sustainability benefits.

BENEFITS

- You make it on site as and when you need it; you will never run out of cleaning solution again
- Stops all over and under dilution, so you leave the surface with the best possible finish and is more cost effective
- Leaves a smear and chemical free finish; this allows surfaces to be cleaner for longer and is more easily maintained
- So simple and safe to use with no harmful chemical effects and it is safe in all environments
- 80% reduction in packaging and a 66% reduction in deliveries supporting our carbon footprint

A Disinfectant

One of the great benefits of using our Toucan Eco is that it is not just a great cleaning solution it is also a proven disinfectant.

Certificated to:

EN1276 (2019), EN14476 & EN16777

The ideal solution to tackle dirt and germs together in one application.

Toucan will also help with reducing odours in textiles without the risk of any damage or discolouration.

Quite simply, it is the perfect sustainable solution for the future.
